

# CodeB Wallet

Fact sheet · [myeudi.app](https://myeudi.app)

---

## CodeB Wallet in brief

**Short (about 40 words):** CodeB Wallet is an Android wallet for the European Digital Identity framework (eIDAS 2.0). It holds digital ID documents, shares only the data a service asks for, checks other people's IDs and signs PDFs. It is made by Aloaha Limited, Malta. Closed beta; independently developed and not certified.

**Longer (about 100 words):** CodeB Wallet is an independent Android wallet for the European Digital Identity (EUDI) framework, built to the EU Architecture and Reference Framework (ARF) 3.0. It receives documents such as the Person Identification Data (PID) via OpenID4VCI and shares them online via OpenID4VP or in person over NFC and Bluetooth (ISO/IEC 18013-5), with selective disclosure. It reads the chip of electronic passports and ID cards, signs PDFs with signature cards over NFC, works as an access card and as a passkey for website sign-in. The download is about 17 MB. CodeB Wallet is developed by Aloaha Limited, Malta, active in PKI and digital signatures since 2003. CodeB Wallet is in a closed beta, independently developed and not certified; documents from the CodeB issuer are test credentials.
